

Michelle Edwards is a Regional Planner with the Rappahannock Rapidan Regional Commission in Virginia, where she has managed the planning district's environmental and natural resource programs for the past ten years. Her work at the Commission has included stormwater program development technical assistance, Chesapeake Bay WIP Phase II planning, local TMDL coordination, and development of the Backyard Rainscaping Program in cooperation with Friends of the Rappahannock and Master Gardeners. Michelle previously worked as an Environmental Planner with the Virginia Department of Conservation and Recreation and as a contractor for the U.S. Environmental Protection Agency's Office of Water. She holds a B.S. in Environmental Studies from Bucknell University, and a Masters of

Public Affairs degree in Environmental Policy and Natural Resource Management from Indiana University. Additionally, she is an appointed member of the Virginia Chesapeake Bay Stakeholders Advisory Group.

Martha C. Narvaez is a Policy Scientist and Associate Director at the University of Delaware's Water Resources Center (DWRC), a unit of the Institute for Public Administration at the Biden School of Public Policy & Administration. Martha is responsible for providing regional watershed technical, policy, and research support to state and local governments; University staff and faculty; and nonprofit organizations in Delaware and the Delaware Valley. These responsibilities include research in water resources issues and policy, development and coordination of public education and outreach initiatives, advisement on State and local water resource issues, assistance with graduate courses at the University of Delaware, and advisement of graduate and undergraduate students. Prior to becoming a

University of Delaware staff member, Martha was employed by the Chesapeake Research Consortium at the USEPA's Chesapeake Bay Program Office in Annapolis, Maryland; the Public Works Department in the City of Wilmington, Delaware; the Conservancy of Southwest Florida in Naples, Florida; and Environmental Consulting Services Inc. (ECSI) in Middletown, Delaware. Martha received her Bachelor of Science (BS) in Biology from Lehigh University and her Master of Public Administration (MPA) degree from the University of Delaware where she specialized in watershed management.
