Load estimates
Cost estimates

The WIP Data Dashboard

What is the Dashboard?

The purpose of the WIP Data Dashboard is to consolidate and provide accessibility to technical and scientific information in one cohesive location and to provide guidance on how and why the information should be used.

This information includes:

- Water quality monitoring information
- Information to help geographically target restoration efforts
- Information to help choose BMPs
- Current BMP implementation and opportunities

The WIP Data Dashboard

What can you do with it?

- Targeting restoration efforts geographically, by sector, or by practice
- Developing scenarios to run on the Chesapeake Assessment Scenario Tool (CAST)
- Outreach and communication of water quality information
- Building local stories
