-

Communication Request

Healthy Watersheds, Protected Lands,
Brook Trout and Fish Habitat
Outcomes

Incentivized conservation at
the local level and improved
communication with local
government officials.

Communication Request

Oyster Outcome

Communication that underscores the regional, national and international significance of the Chesapeake Bay Program's tributary-based oyster restoration strategy and disseminates scientific findings about spat set on alternative (non-shell) reef substrate.

Communication Request

SAV Outcome

Communication that promotes the benefits of underwater grasses and garners support for a sustainable submerged aquatic vegetation monitoring program.

Potential Response

*Improved communication with local
government officials.*

August: Invited Diane Cameron (EcoLogix) to present relevant findings from report on the priorities of local governments and the most effective methods of reaching elected officials.

How can our Workgroup
help?

Potential Response

Communication that underscores the importance of our oyster restoration strategy.

Working to schedule a meeting with GIT1 Coordinator and Staffer.

How can our Workgroup
help?

Potential Response

*Communication that promotes the
benefits of SAV.*

Scheduled a meeting with SAV
Workgroup Co-Chairs.

How can our Workgroup
help?

Thanks!
