

Follow Up Actions for the Environmental Finance Advisory Board Report: Illustrative Private Equity Capital Model for Chesapeake Bay Water Quality Project

1. Set up a webinar for the authors to present the results of the report to the Bay Program and partners, with a focus on how the report can be used by local government.
  - a. Status: In progress
2. Identify existing resources available from member states or partners where the information in the report could be useful and feasibly integrated
  - a. Status: To be discussed, I think this is something the BFWG could do.
3. Develop a guidance document on the implications of the report for local government and training on how to use the existing tool developed by EFAB
  - a. Status: To be discussed, this would need to be a funded effort.
4. Develop a document similar to the report but targeted specifically for local government along with a simplified tool.
  - a. Status: To be discussed, this would need to be a funded effort.
