Science-Based Approaches and Tools for Targeting Chesapeake Resources

Scott Phillips, John Wolf, and Ken Hyer USGS and CBP

Management Board Meeting
June 9, 2022

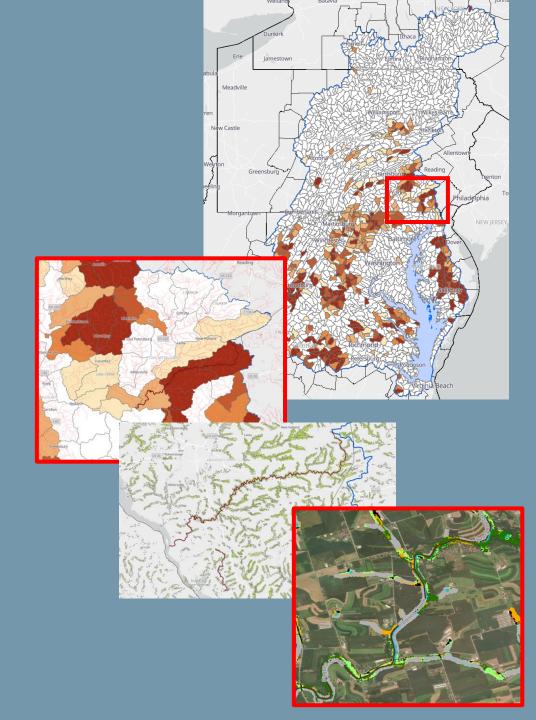

Purpose of Today's Presentation

 Inform MB of approach and tools for targeting resources

 Provide examples for achieving multiple CBP outcomes

Feedback on next steps

Targeting Resources: Benefits to People, Wildlife, and Habitats

Current Approach

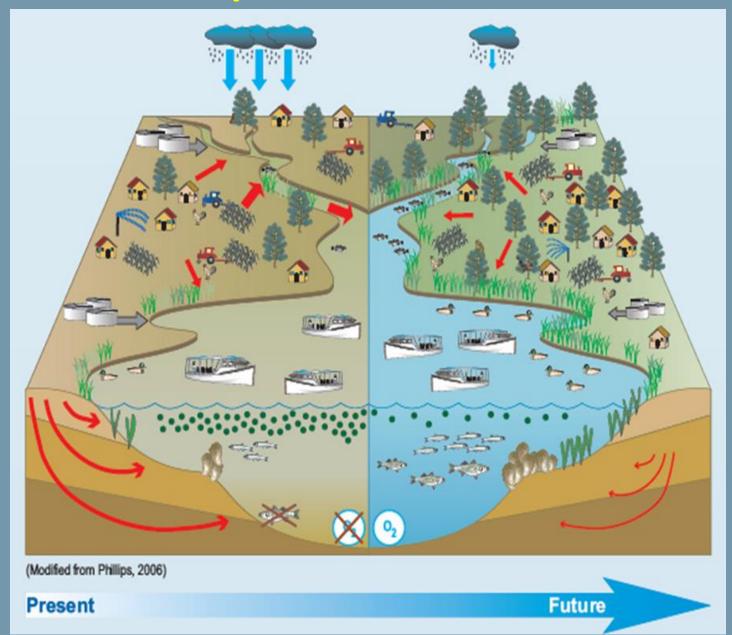

- Nutrient reduction
- TMDL: behind schedule for 2025

Increase emphasis on people, wildlife, and habitats

- More return on WQ investments
- Achieve multiple CBP outcomes
- Promote local benefits

Targeting

- Places
- Programs
- Web Hub

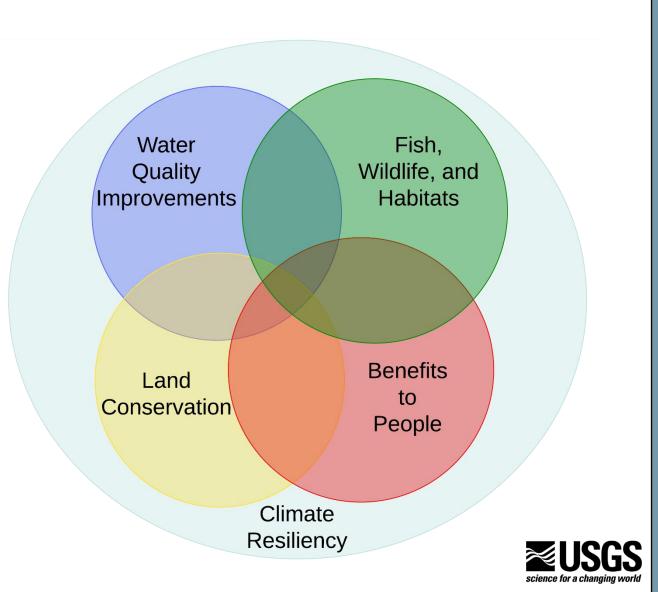

Now is the Time to Address Multiple Outcomes

- Accelerate progress to meet 2025 deadlines:
 - Water-quality practices
 - Lagging CBP outcomes
 - More emphases on climate resiliency and diversity
- New Funding Opportunities
 - \$1.2B federal and state existing funding
 - Infrastructure Law and other federal programs
 - State and local govt. programs
 - NGOs and private capital
- Growing interest from stakeholders
 - Federal and state agencies, CBC, local governments, NGOs
 - Expand their tools and resources

Science Approach for Targeting Resources

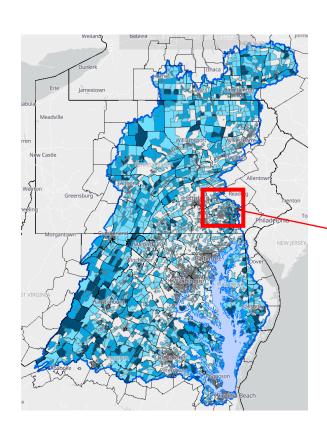

- Organize around topics:
 - Water-quality improvements
 - Fish, wildlife, and habitat
 - Land conservation
 - Benefits to people
 - Improve climate resiliency
- Strive for multiple benefits
- Build from existing tools & stakeholder programs
- USGS, EPA, Chesapeake Conservancy, & NOAA

Federal

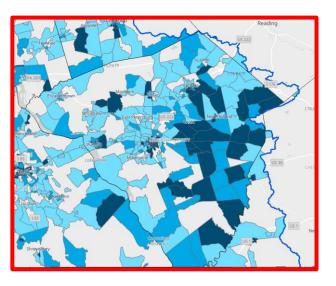

States and DC

Local Govt., NGOs

Multiple Outcomes

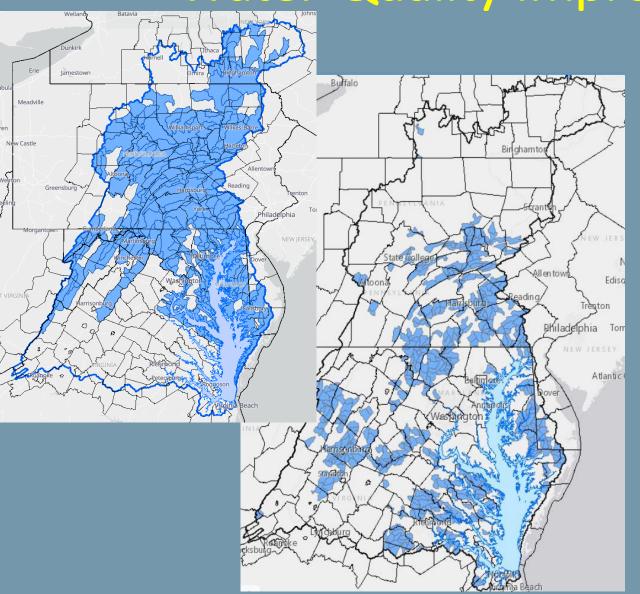

-Expand existing efforts-New places-Additional funding

Need

- Accelerate implementat ion
- Tidal waters improvemen ts
- Local WQ benefits
- Address other CBP outcomes
- Increase climate resiliency and DEIJ

Water-Quality Improvements

Existing Tools

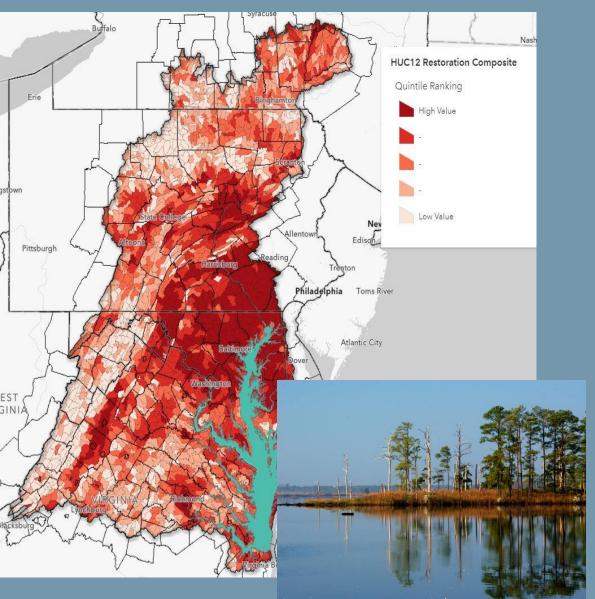

- Most effective basins
- Ag priority watersheds
- Watershed dashboard
- CAST

- Infrastructure funds
- NRCS and ag programs
- Benefits to other CBP outcomes
- Ecosystem services for selected BMPs

Fish, Wildlife, and Habitat

Needs

- Accelerate buffers and wetlands
- Connect WQ, habitat, and fisheries
- More habitat information

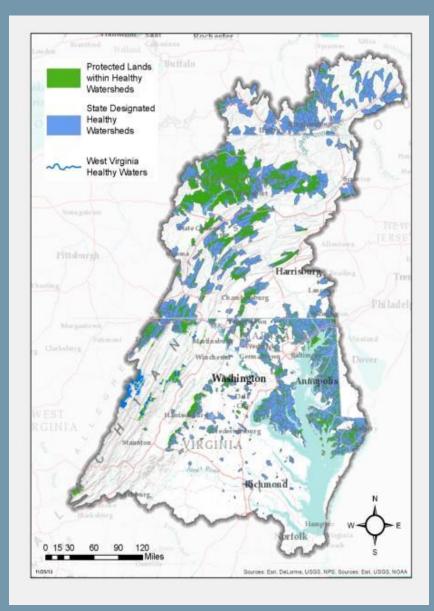

Existing Tools

- NFWF tools
- Cross-Outcome Mapping

- Expanded NFWF programs
- USFWS Chesapeake WILD
- New habitat data for coasts and watershed

Land Conservation

Need

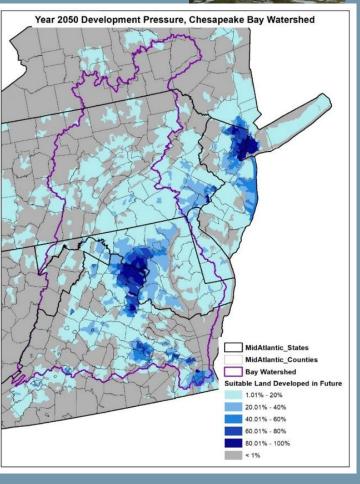

- Increase land protection
- Support local decisions

Existing Tools

- CCP Conservation Atlas
- Healthy Watershed Assessment
- Land-change model

- America the Beautiful
- High-resolution land data

Benefits to People

Need

- Increase stewardship & public access
- Focus on underserved communities
- Benefits to local govts

Existing Tools

- Conservation Atlas
- Chesapeake Diversity Dashboard

- New funding for underserved communities
- Climate resiliency programs

Management Questions and Examples

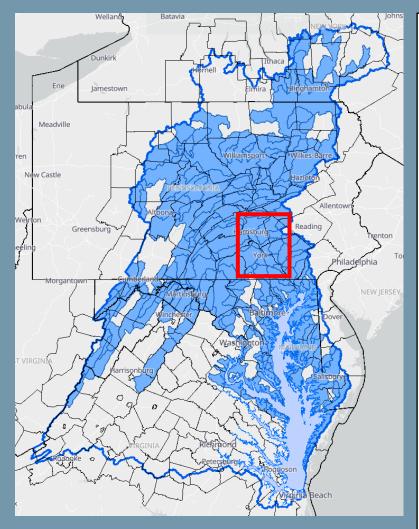

- Web Hub of tools for multiple outcomes
- Where can additional CBP outcomes for habitats and people be achieved in the Most Effective Basins?
 - Example: Lancaster County
- How can multiple CBP outcomes be considered by several programs?
 - Example: Middle Peninsula of VA
- Where can conservation activities achieve CBP outcomes for healthy watersheds, land protection, and habitat?

North America's Largest Estuary

Management Question:

How can additional CBP outcomes for habitats and people be achieved in the Most Effective Basins?

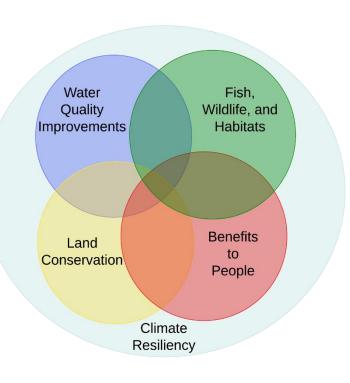

Example Application: Lancaster County

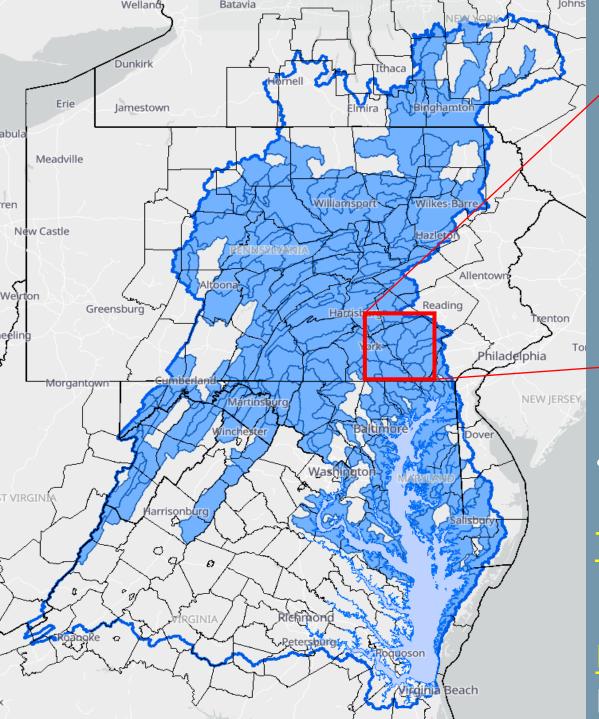

Multiple outcomes

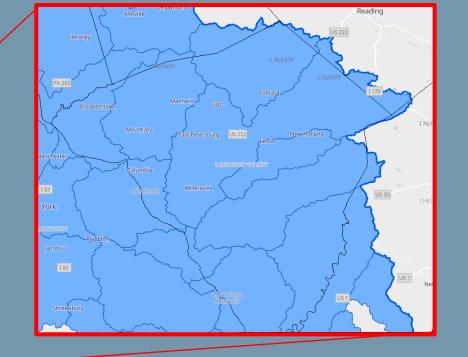

Tools & integrating maps

Programs

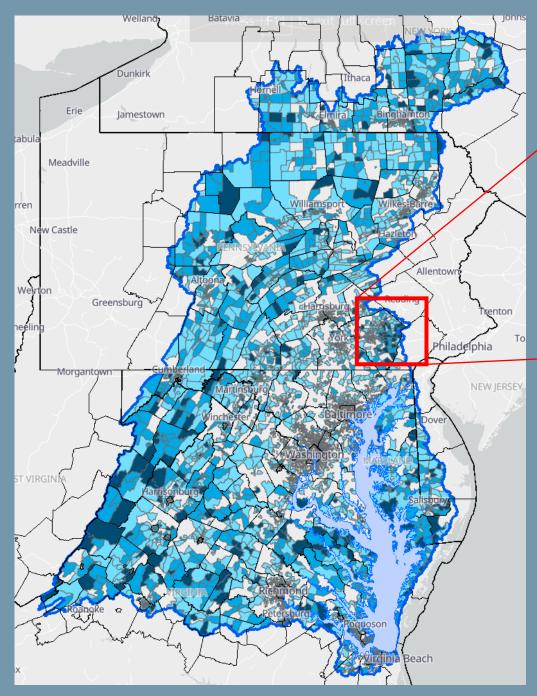

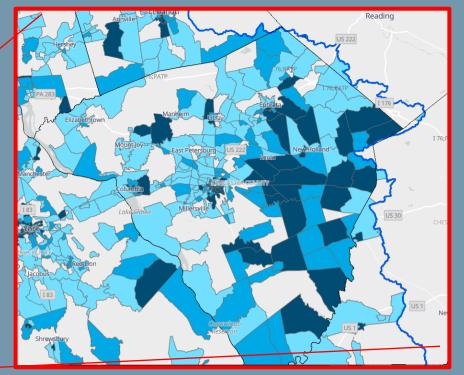

2 CBP Outcomes

Bay TMDL & Standards Attainment

Tool: Most Effective Basin Map

Programs: EPA CBP Grants & State Programs

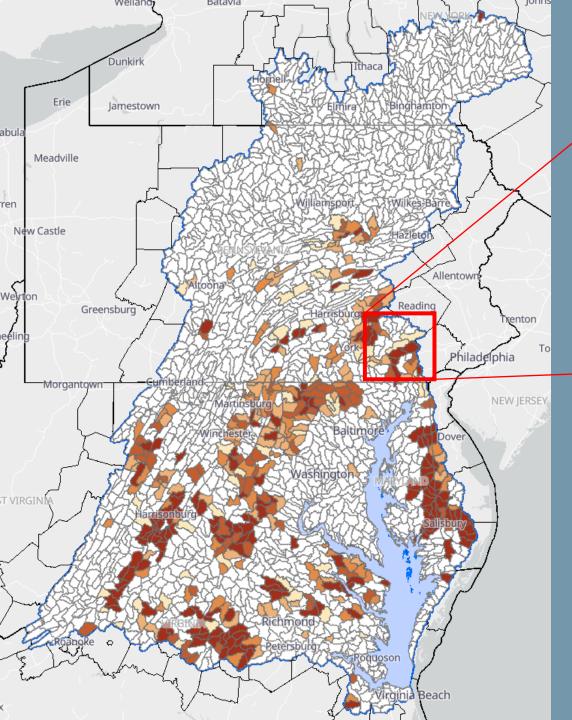

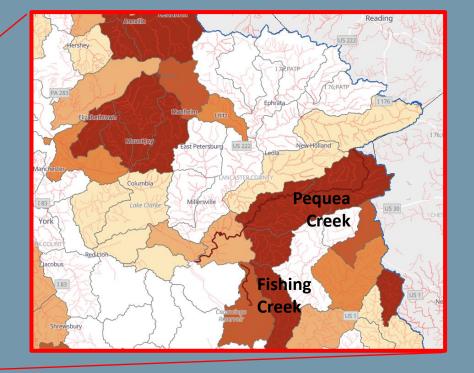

3 CBP Outcomes

- Bay TMDL & Standards Attainment
- Diversity

Tools: MEB + Disadvantaged communities

<u>Programs</u>: EPA, States, +*EPA Grant for Disadvantaged Communities*

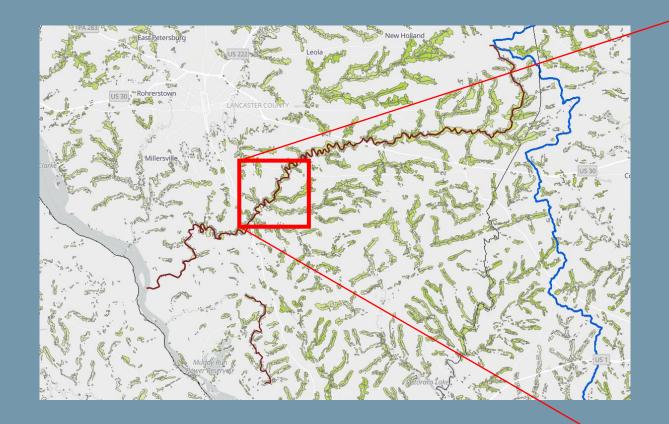

4 CBP Outcomes

- Bay TMDL & Standards Attainment
- Diversity
- Stream condition/local waters

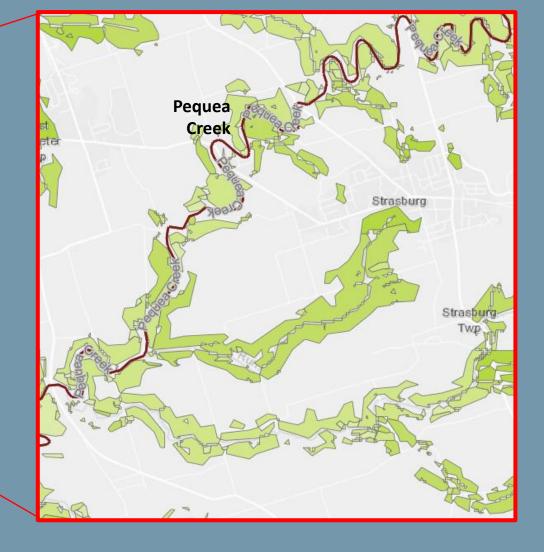

Tools: + Ag Priority Watersheds

Programs: - EPA, States +NRCS Programs

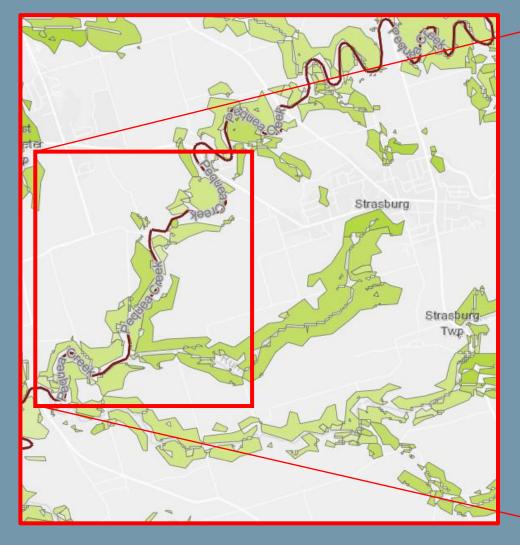

5 CBP Outcomes

- Bay TMDL & Standards Attainment
- Diversity
- Stream condition
- Forest buffers

<u>Tools:</u> + Forest buffers

<u>Program:</u> - EPA, States, NRCS, +local programs

Current land cover: 30 meters

New High-Resolution Land Data

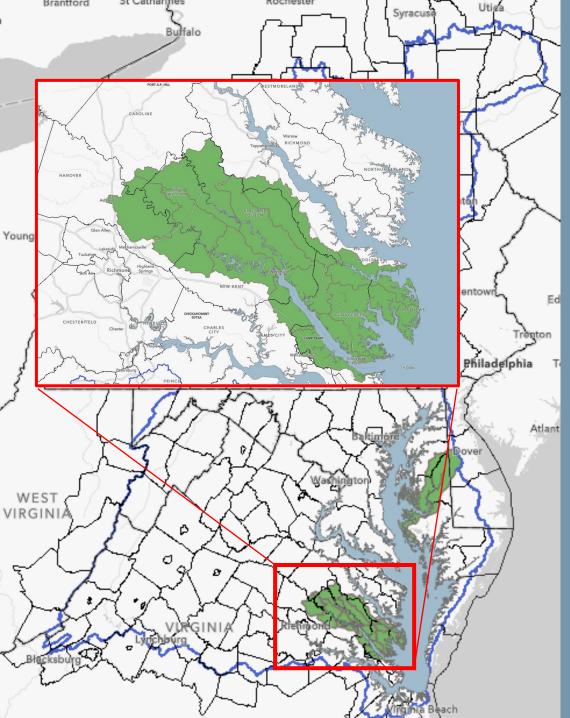

Lancaster Opportunities

CBP Outcomes: Multiple benefits for WQ, Habitat, and People

Opportunities

Demonstrate how resources can be targeted through multiple programs

- What other outcomes would you like considered?
- What other programs could be included?
- What other information would help?

Management Question:

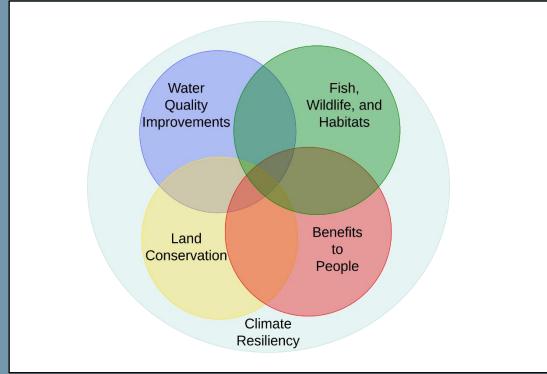

How can multiple CBP outcomes be considered by several programs?

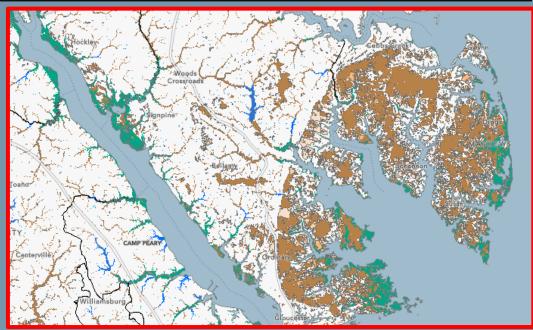

Example: Middle Peninsula, VA

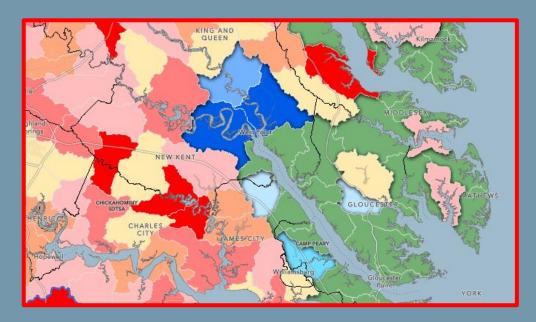

Potential Programs:

- NOAA Habitat Blueprint
- USCOE Comprehensive Plan
- NFWF Business Plan
- America the Beautiful

CBP outcomes: Wildlife/habitat,
Conservation, WQ, People, and Climate

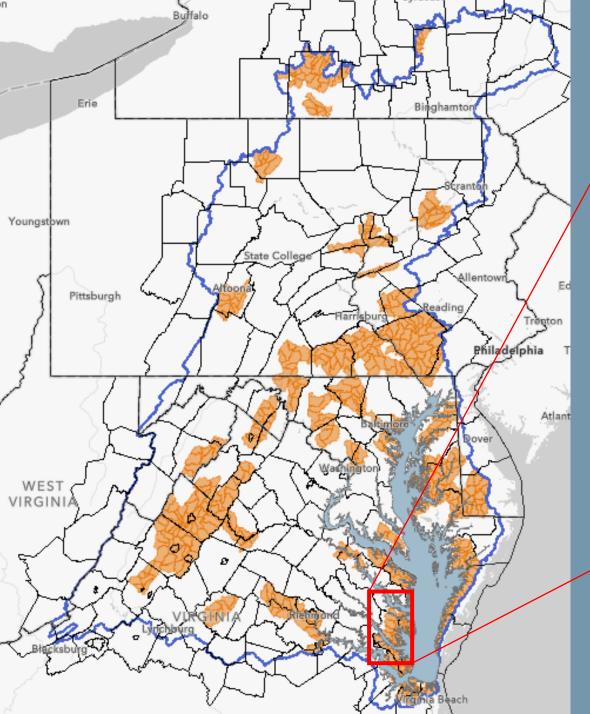

Habitat and Fisheries Outcomes:

• Black Duck, Wetlands, Fish Passage, Fish Habitat

Tools: Watershed Resources Registry, Fish Passage Prioritization Tool, ACJV Black Duck Viewer, NFHAP

Programs: Atlantic Coast Joint Venture, NOAA Habitat blueprint, NFWF

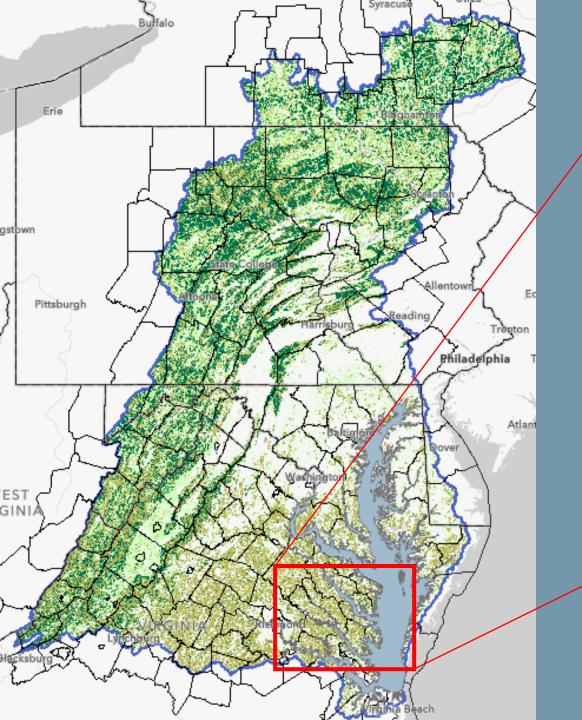

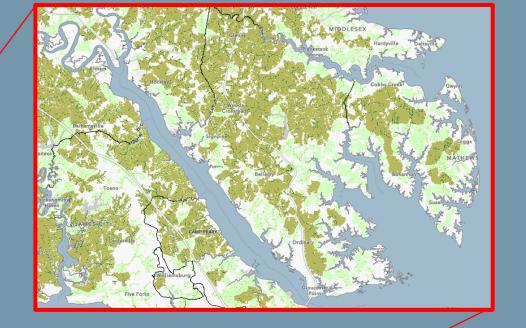

Water-Quality Outcomes:

WIP 2025, WQ Attainment, Toxic
 Contaminants

Tools: NFWF Business Plan 2018/CAST; Ag priority watersheds, PCB maps

Programs: NFWF, NRCS, EPA State Grants,

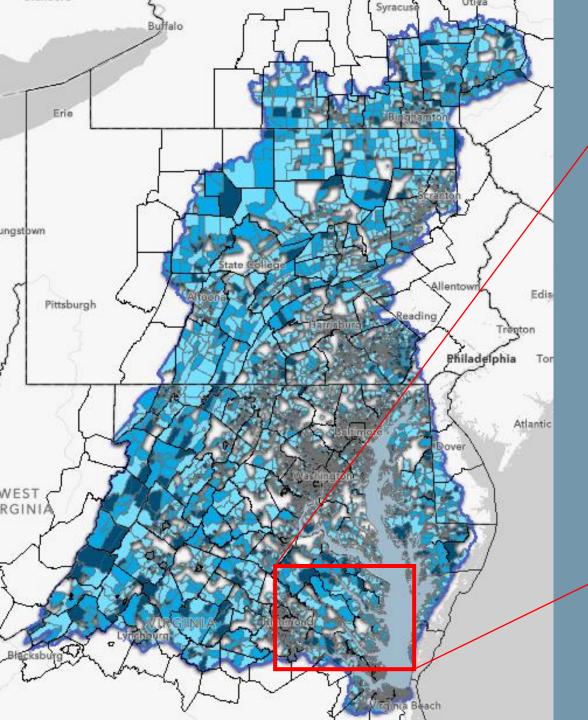

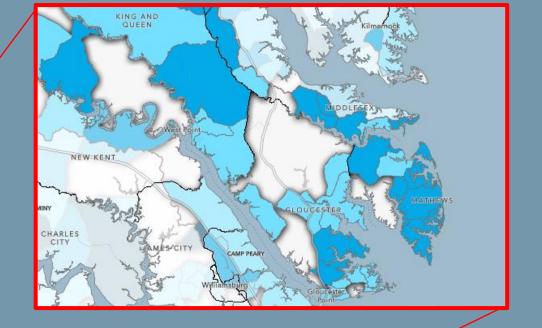

Conservation Outcomes

• Land protection, healthy watersheds

Tools: CCP Forests, Habitat, Farmland, Heritage and Public Health Models, Public Access

Programs: Chesapeake Conservation Partnership: federal, state, and NGO programs. America the Beautiful

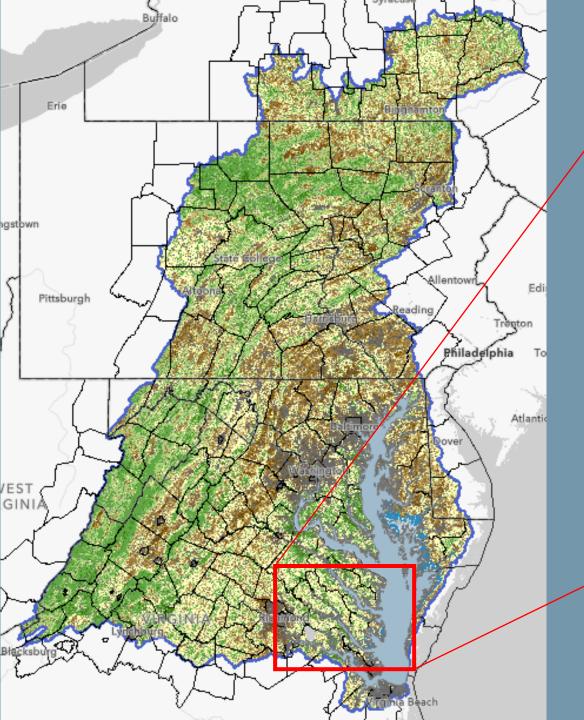

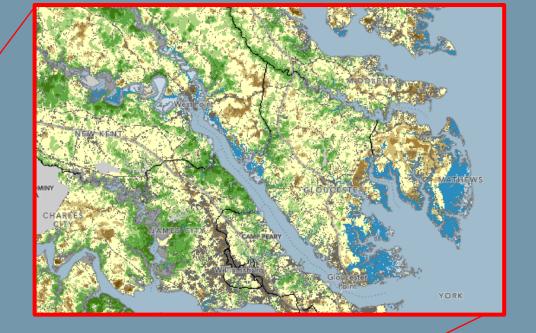

Benefits to People Outcomes:

Diversity, Public Access

Tools: Environmental Justice and Equity
Dashboard, ELit Tool, Ecosystem Services, Public
Access, Organizational Capacity

Programs: Multiple programs for disadvantaged communities

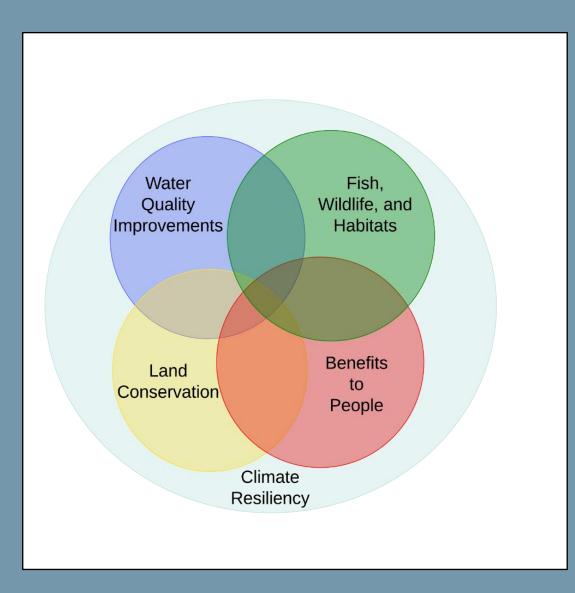

Climate Resiliency Outcomes

Adaptation

Tools: TNC Resilient Sites, NOAA Sea Level Rise Viewer, National Flood Hazard Layer, Urban Heat Island Mapping

Programs: Infrastructure Law, State Local Programs

Middle Peninsula Opportunities

CBP Outcomes: Multiple outcomes for Habitat/Fisheries, WQ, Conservation, People, and Climate Resiliency

Opportunities

Demonstrate how resources can be targeted through multiple programs

- What other outcomes would you like considered?
- What other programs could be included?
- What other information would help?

Next Steps for Targeting Effort

CBP interaction

- GITs: stakeholder interaction
- MB and PSC: Agencies involved in funding and polices
- NGOs and local governments

Short-term actions

- Web Hub
- Promote use of existing tools
- Ecosystem services for selected BMPs

Longer-term action

- Enhance tools with new land use data
- Connections between tools
- Provide stakeholder support
- Would require more resources

Chesapeake Executive Council Advisory Committees Citizens **Principals' Staff Committee** Scientific & Technical **Management Board Goal Implementation Teams Communications Workgroup** Maintain Healthy Watersheds Water Quality Scientific, Technical Assessment & Reporting Enhance Partnering, Leadership and Fostering Chesapeake Stewardship

Discussion Questions

Q1: What are some of the highest priority, multi-outcome management questions your jurisdiction or agency are considering?

Q2: How does your agency or jurisdiction envision using the tools for targeting resources for multiple CBP outcomes?

Q3: What would help your agency or jurisdiction with targeting efforts for multiple CBP outcomes?

Q4: What future improvements would your jurisdiction or agency like to be considered for the WebHub or targeting efforts?

Answer using mentimeter
