

**Questions for the Management Board on Targeting Resources for Multiple CBP Outcomes**  
(Will use mentimeter to get feedback from the MB and interested parties).

Q1: What are some of the highest priority, multi-outcome management questions your jurisdiction or agency are considering? (short answer, can provide multiple responses)

Q2: How does your agency or jurisdiction envision using the tools for targeting resources for multiple CBP outcomes? (Rank in order of priority: 3 highest, 1 lowest)

- Pursue additional opportunities to achieve multiple CBP outcomes where stakeholder organizations are already working together (expand capacity of existing efforts)
- Identify new places and opportunities to achieve multiple CBP outcomes.
- Attract new funds to expand existing efforts or support new efforts to address multiple CBP (some grant or program requests are stronger when multiple outcomes have been considered for a geographic area).

Q3: What would help your agency or jurisdiction with targeting efforts for multiple CBP outcomes? (Pick one)

- We already have tools or approaches for targeting resources for multiple CBP outcomes (so we wouldn't use the WebHub and associated information).
- We would like to supplement our existing tools with selected information available in the WebHub.
- We would like to learn how to use the WebHub tool to help inform decisions.
- We would like custom analysis (technical support from a WebHub expert) for questions that are most important to our agency or jurisdiction).

Q4: What future improvements would your jurisdiction or agency like to be considered for the WebHub or targeting efforts? (short answer, can provide multiple responses)
