

New Land Cover and Land Use Data for Counties in the Chesapeake Bay Watershed

Peter Claggett, U.S. Geological Survey

September 20, 2016

Webinar: <http://www.chesapeakebay.net/calendar/event/24320/>

Presentation Outline

1. Purpose and Background
2. Production of 2013 Land Use Data
3. Production of historic land use data, 1984 – 2013
4. Local Review Expectations and Process
5. Q & A.

Chesapeake Bay 2017 Mid-Point Assessment

Goal: Determine whether the implementation the CBP Partnership's restoration strategies by 2025 will achieve water quality standards in the Bay.

Objective: Make this determination based on the best available science data, tools, BMPs, and lessons-learned.

#1 Priority: improve accuracy of land use/cover data.

Best available data = county & municipal level land use, land cover, parcels, sewer service areas, zoning, and other relevant information.

Local land use and parcel data

- Low-density Residential
- Recreation
- Agriculture
- Roads

High-resolution land cover data

- Impervious surfaces
- Tree canopy
- Low vegetation
- Water

Phase 6 Land Uses

- Impervious-Roads
- Forests
- Turf Grass
- Open Space

Local Parcel and Land Use Data Collected by CBP

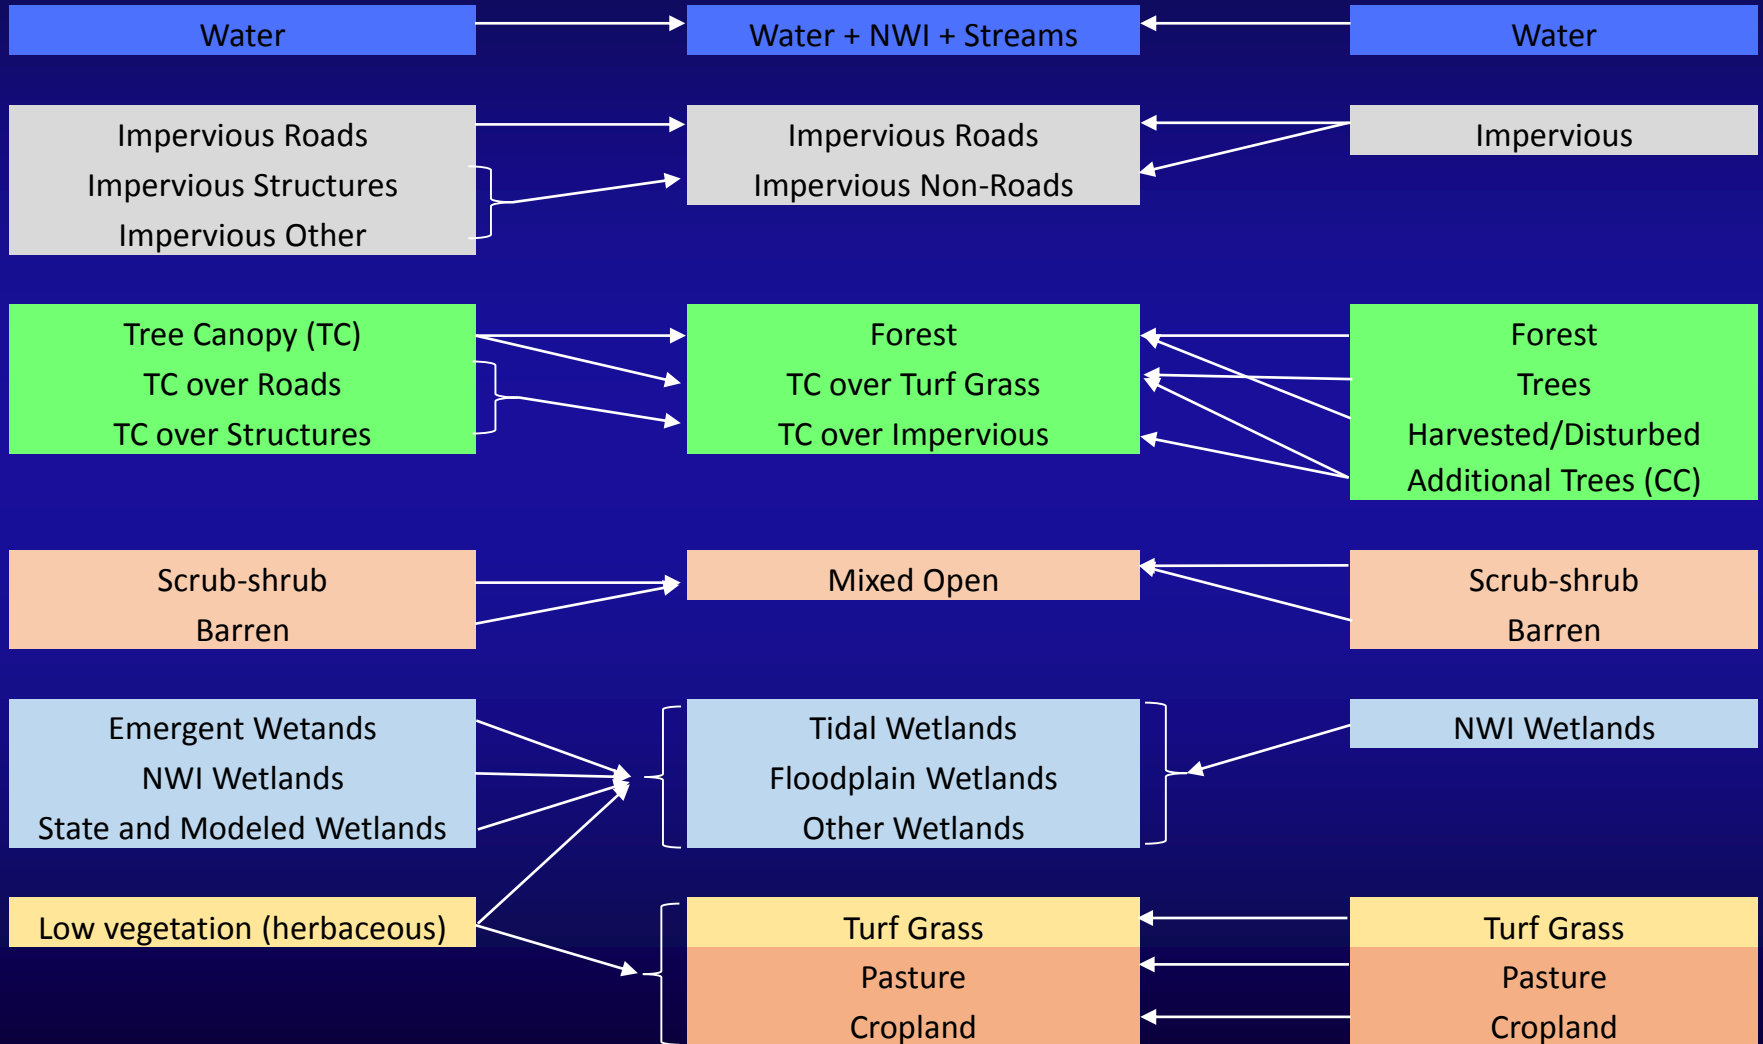

Land Cover to Land Use Crosswalk

Chesapeake Conservancy/ UVM

Phase 6 CBP

Worldview Solutions Inc.

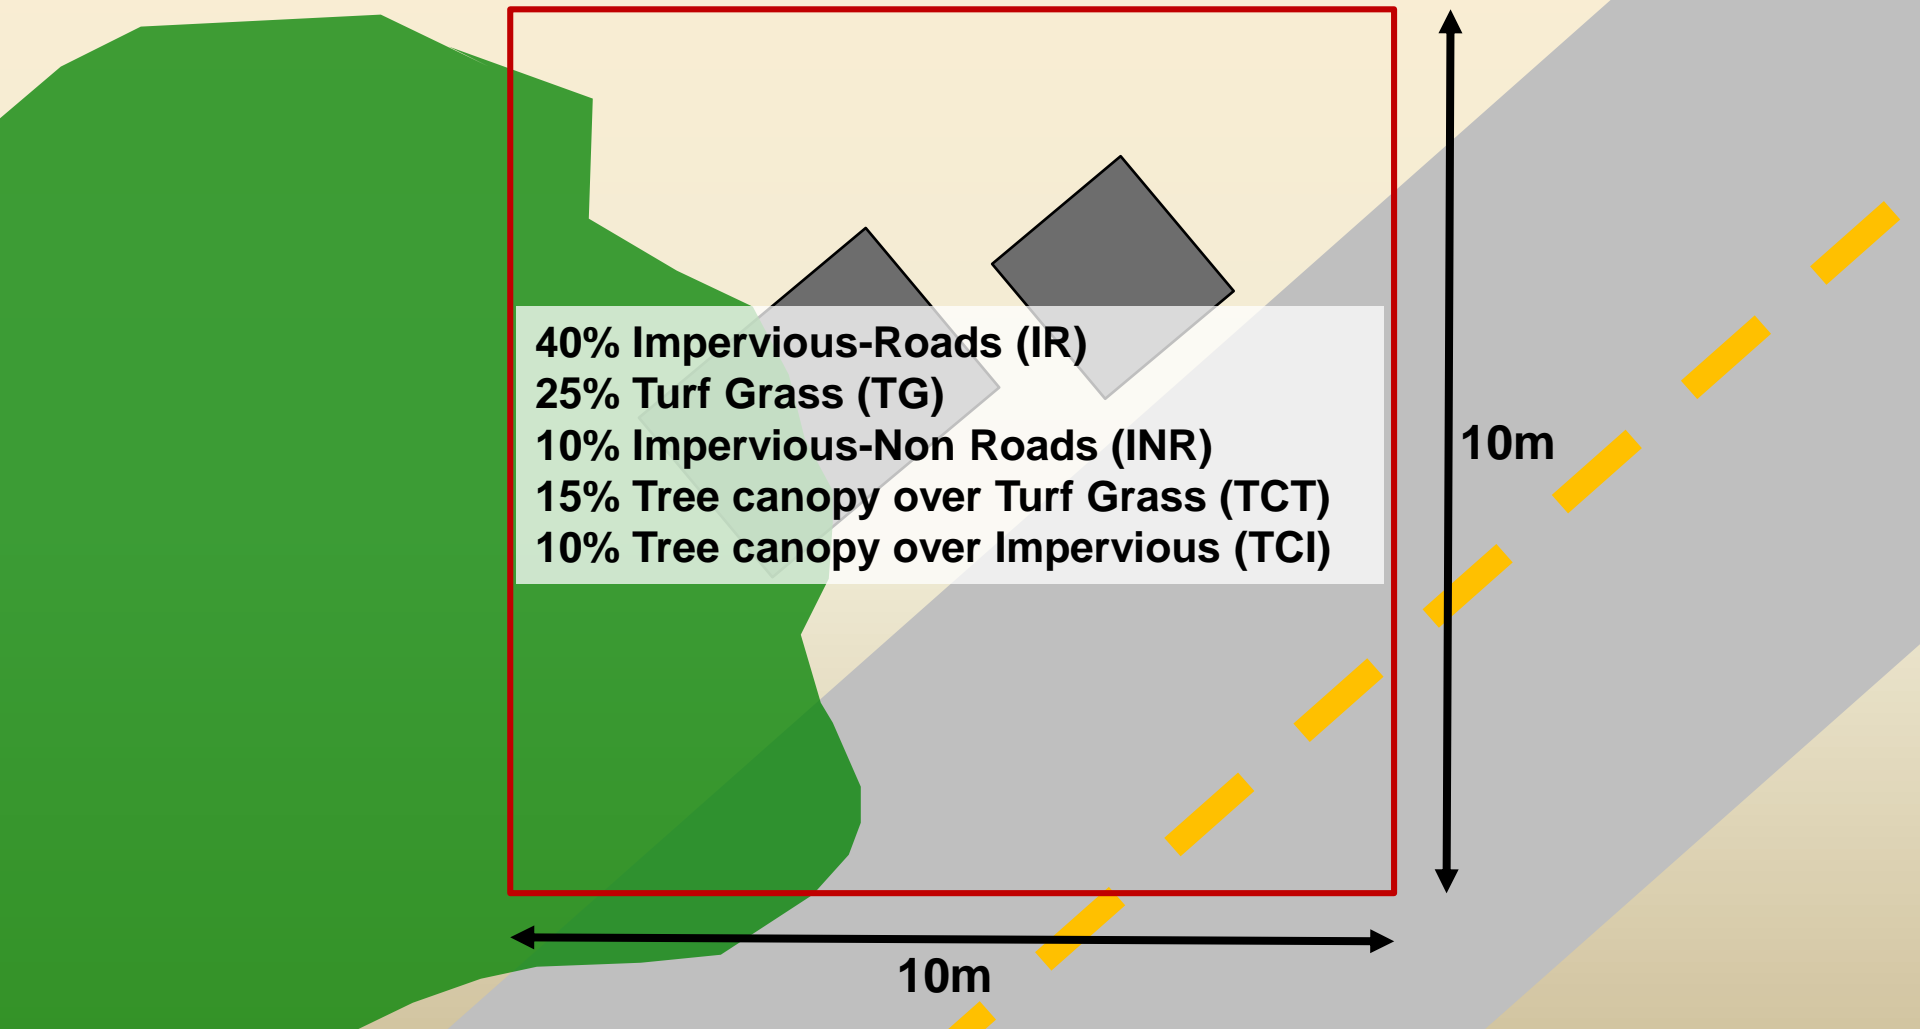

2013 1-meter Land Cover

Phase 6 Land Use Database – from local & high-res data

- Thirteen different 10m resolution raster datasets
- Each cell includes the fractional composition of all land uses.

Coarsened to 10m (low vegetation on top of impervious)

P6 Developed Land Uses

Impervious Roads: paved and unpaved roads and bridges.

Impervious Non-Roads: buildings, driveways, sidewalks, parking lots, runways, and some private roads.

Tree Canopy over Impervious: trees overhanging impervious surfaces.

Tree Canopy over Turf Grass: trees overhanging low vegetation within 30' to 80' of impervious non-roads.

Turf Grass: low vegetation within developed* areas that are potentially fertilized and/or mowed and assumed to have partially compacted soils with a shallow organic layer.

P6 Developed Areas- defined

With local data:

- Land Use:
 - residential, commercial, industrial, recreational, institutional and other urban uses.
- Parcels:
 - ≤ 10 acres with at least 1000ft² (93m²) of non-road impervious surfaces.

With just land cover data:

- Zone within 30'-80' of dense non-road impervious surface areas.

Impervious Non-Roads
over
Developed Land Uses
(national data)

Impervious Non-Roads
over
Developed Land Uses
(local data)

Impervious Non-Roads
over
Developed Parcels
(local data)

P6 Natural Land Uses

Forest: trees farther than 30' to 80' from impervious non-roads with patch sizes ≥ 1 acre.

Wetlands: Areas mapped as wetlands in the National Wetlands Inventory (NWI), state wetland datasets, or areas modeled as wetlands based on soils, vegetation, and topography.

Water: All waterbodies mapped in the high-resolution land cover data, NWI water features, and stream surface areas modeled from a 10m-resolution Digital Elevation Model.

P6 Mixed Land Uses

Mixed Open: all scrub-shrub and low vegetation and barren lands associated with landfills, surface mines, beaches, transmission line right-of-ways, vacant lots, etc.

Mixed Open (30%)/Impervious (70%): low vegetation and barren lands within industrial, transitional, and other areas assumed to be heavily compacted.

Mixed Open (30%)/Turf Grass (70%): low vegetation and barren lands within large parcels and institutional and government properties assumed be variably managed.

Federal Facilities Editor Tool

gis.chesapeakebay.net/fedfacs/

Federal Facilities Editor

Use this map to edit the land use data for Federal Facilities.

Find a facility by typing an address in the search box, or by zooming/panning the map.

Click a facility to view and/or edit its data.

Pasture/Hay: Herbaceous and barren lands that are not classed as turf grass or mixed open. The portion of such lands that are pasture/hay is determined by the frequency at which the lands are classified as pasture/hay in the NASS Cropland Data Layers (2008 through 2015).

The screenshot displays the Federal Facilities Editor tool interface. On the left, a sidebar contains instructions and a legend. The main area shows a satellite map of Norfolk, VA, with a search bar at the top and a 'Locate' button. A facility is highlighted in yellow on the map. On the right, a 'Federal Facilities' panel shows the following data:

UID	681
Unit Name	NAVSTA NORFOLK
Alternate Name	NAVAL STATION NORFOLK
Local Owner	United States Department of
Manager Name	NAVFAC ML
Local Manager	
Facility Contact	
Facility Info	
Regional Coordinator	
Regional Info	
Acres	3509.11930625
Notes or Corrections	
Mixed Open Land Use %	35%
Turf Grass Land Use %	65%
Crop Land Use %	0%
Pasture Land Use %	0%

Phase 6 Land Use Database: Production Schedule

January 2016 – August 2016:

- 1m-resolution Land Cover Data
- Local Review and QA/QC of Land Cover Data
- 10m-resolution Land Use Methods and Models

September – mid-October 2016:

- 10m-resolution Land Use Data
- Pennsylvania Potential Wetlands Data

October – mid-November 2016 (4 week review):

- Local Review of Land Use Data

November 2016:

- Finalization of Land Use Data

Local Review of Land Use Data: Process and Expectations

1. Review CBP interpretation of local land use and parcel data.

Action: Tell us if we've misinterpreted your data.

2. Review accuracy of MS4, CSS, Sewer Service Areas, and Septic estimates.

Action: Provide us with new/updated GIS data or septic estimates if needed.

3. Become familiar with the CBP Land Use classification.

Options:

- a. Review data on the web (no GIS software or expertise required)
- b. Review data in house. Download the data from FTP site and review independently in a GIS environment.

Local Review of Land Use Data: Process and Expectations

1. Review CBP interpretation of local land use and parcel data.

Chesapeake Bay: A Landsat 8 Surface Reflectance Mosaic. USGS provides scientific information to help manage this vital ecosystem. USGS EROS created this true color composite image using Provisional Surface Reflectance data from five Landsat 8 scenes, acquired in October and November 2014.

A snapshot from space. [Satellite Map](#) of the Chesapeake Bay aids management efforts.

Phase 6 Land Use Review Application

The Chesapeake Bay Program (CBP) partnership wants to ensure that new land use and land cover data being developed to inform Chesapeake Bay restoration activities, including the Phase 6 suite of modeling tools, are as accurate and useful as possible. For this purpose, the CBP's Land Use Data Team is seeking outside review of this new land use and land cover data. This review process is open to all interested parties, but it is especially intended for local governments to participate in it. Formal review of this data can be completed by using the map application.

[Access the Map Application](#)

The Phase 6 Land Use Review Application has the following functionality:

- View Phase 6 Land Use data
- Download Phase 6 Land Use data for available counties
- Submit comments with selected coordinates
