Policy and Prevention Management Strategy Version 2

Proposed Changes

- **New Factor Influencing Success:** The extent of collaboration and coordination among the science and management communities at a scale that is commensurate with the extent of PCB impairments and TMDLs
- **New Management Approach:** PCB Consortium
- Updates from Indicators/Story Map
- Lessons learned from WWTP and Voluntary PCB Removal Study
- Stating intention to work on other pollutants

Policy and Prevention Management Strategy Version 2

Next Steps

- Updates still coming from jurisdictions and EPA Region III
 - Table of Management Approaches — need to update and modify
 - Science needs updated through annual USGS PCB conference September 26
- September 23 - Input ends (30 days)
 - 10 days to make additional changes – October 3
 - **October 4** - Final documents to Management Board and Communications team as FYI
 - **October 18** – MB informed they are final
