PA Department of Environmental Protection Retweeted

Patrick McDonnell @SecMcDonnell · 15m

Our coastal zones are vital environmental, economic, & community resources for the commonwealth. Each year, the diverse Coastal Zone projects help us rethink, reexamine, and rededicate our efforts towards a comprehensive approach to ensuring the sustainability of these habitats.

TOO GOOD NOT TO SHARE

"Look Before you Leave" to Avoid Spreading the Spotted Lanternfly

Currently a quarantine is in place to stop the movement of this pest to new areas and to slow its spread within the quarantine. The quarantine affects a variety of plant, wood and stone products. Surveys are currently underway to determine the complete spread of this pest in southeastern Pennsylvania. Efforts are also underway to ensure the spotted lanternfly is not present in other parts of the commonwealth.

Not sure if you're in the quarantine? [Use the interactive map!](#)

Chesapeake Bay Program Releases First-Ever Citizen Stewardship Index

The [Chesapeake Bay Program](#) released the first comprehensive survey of stewardship actions and attitudes across the watershed. The Index reveals what actions residents are taking to protect clean water and restore environmental health and shows how much of the region has volunteered or spoken out on behalf of the environment. It also forecasts future stewardship by measuring the willingness of residents to engage in certain actions and responses to perceptions that motivate environmentally responsible behaviors.
