

Elected Officials Watershed Education Guidebook Outline:

**LGAC June 2019 Quarterly Meeting
Discussion & Feedback**

Guidebook Goals and Overview:

- Guidebook Goal: Develop a newly elected officials handbook introducing the Chesapeake Bay Watershed, the Chesapeake Bay Watershed Agreement, Bay Program Partners working on enacting the Agreement Goals and Outcomes and Trusted Sources for resources and assistance.
- Keep to 10 pages with visual and graphic representation
- This will be the first in a series of “chapters”, or brief guidebooks developed to provide elected officials with a snapshot of what they need to know, engaging visuals to better understand the players and priorities, and resources to find out more and get the support they need.

How does the outline flow overall?

Pay particular attention to...

1. Introduction: *Is it helpful to include list of commonly used BMPs?*
2. Local priorities & opportunities: *What are we missing?*
3. What are the ways in which you, as an elected official, can address these priorities?: *Overall review*
4. State-specific context and resources: *Can you help us pull this information together for your state?*
5. Baywide resources (Regional and federal): *Overall review*

Any additional thoughts or concerns?
